Results of healthcare

6. Hip dislocation

Evaluation of the interdisciplinary CPOP consultations

Parental satisfaction in Southern Denmark

Dimensions; staff, context, participation, information and overall impression.

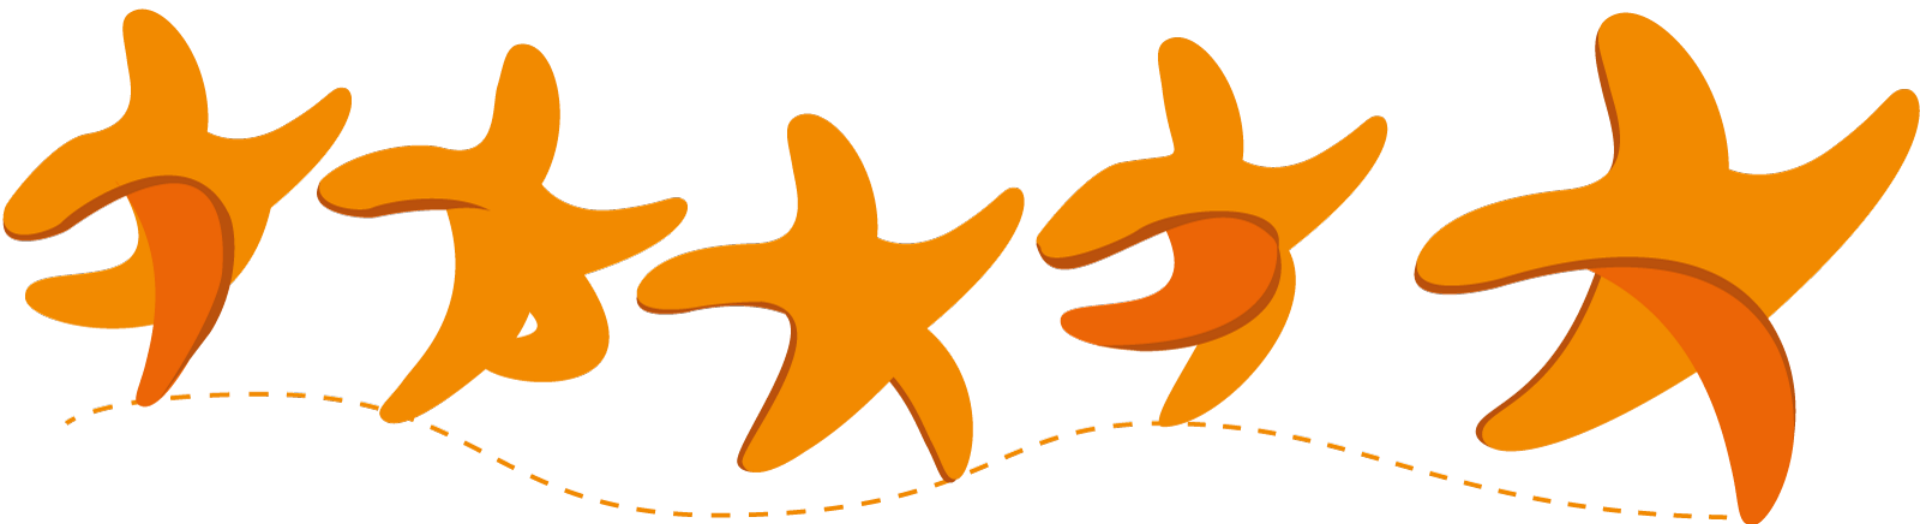

Results: staff's kindness and their professional relevance, highest rated
Involvement of the child and the information provided, lowest rated

Conclusion: High degree of parental satisfaction. Indicating areas where quality can be improved.

Helle Snefstrup Poulsen, Niels Wisbech Pedersen, Ulrike Dunkhase-Heinl

Thanks!
